IMAGINE Software Welcomes New Client, Dexios Corporation

Charlotte, NC – Technology Partners, Inc. (dba IMAGINE Software), a leading provider of medical billing technology, announces its most recent client, Dexios Corporation, has chosen the IMAGINeradiology™ practice management system for their billing and collection needs.

Dexios, a full-service billing company located in Midlothian, Virginia, specializes in billing for radiology groups and imaging centers. After conducting an eight year cost of ownership projection, Dexios determined that IMAGINeradiology™ provides the most cost-effective system with the best billing technology on the market today.

“IMAGINE lured us in with their technology, but hooked us with their partnership mentality,” said Kyle Tucker, President and CEO of Dexios Corporation. “Dexios is positioning itself as a low cost, high performance player in the radiology billing marketplace so we needed a technology partner that shared those characteristics. We couldn’t have asked for a better fit in IMAGINE. People often make the mistake of not looking deeper than the initial purchase price. You have to look at the total cost of ownership.”

“We are extremely pleased that Dexios has selected the IMAGINeradiology™ suite,” commented Frank Hayes, VP of Sales for IMAGINE Software. “Dexios has a similar business philosophy to IMAGINE’s in the belief that our product capabilities and roadmap, commitment to providing unparalleled support, and the value our services provide are what differentiate us in the industry. We look forward to building and sharing a prosperous relationship with Dexios Corporation.”
